Summary

Technically minded UX Designer with 5+ years of experience, specializing in B2B SaaS and web experiences for technical audiences. Passionate about open-source and looking to apply my expertise in Developer Tools, AI-assisted interfaces or accessibility-focused products.

Experience

BECKMAN COULTER LIFE SCIENCES Krefeld, Germany

Web and Digital Experience (Working Student) June 2024 - Currently

- Designed and developed accessible, reusable UI components in HTML, CSS, and JavaScript, ensuring seamless handoffs to engineering teams and optimizing for performance and WCAG compliance.
- Led end-to-end research for a complex interactive UI component, translating domain-specific requirements into a scalable, efficient and intuitive solution for scientific users.
- Redesigned legacy web interfaces to meet modern usability and performance standards, applying systematic analysis to improve load times, mobile responsiveness, and SEO metrics.

QUESTIONPRO Austin, USA

UX Designer March 2022 - August 2023

- Led end-to-end UX design for two core products, focusing on simplifying complex workflows for survey creators and respondents.
- Maintained and evolved design systems and guidelines to ensure product consistency and development efficiency across distributed teams.
- Introduced unmoderated usability testing practices, establishing a scientific, data-driven design process that reduced subjective disagreements and aligned stakeholders.

Education

UNIVERSITY OF SIEGEN Germany

Human-Computer Interaction, Master of Science (M.Sc.) 2023 - Currently
Current grade: 1.5

MODELO UNIVERSITY Mexico

Interactive Design, Bachelor of Arts (B.Sc.) 2016 - 2020
Current grade: 87.8 (out of 100)

Master Thesis Project

- Designed and built an open-source developer tool for blind and low-vision developers, providing context-aware, AI-generated feedback for UI design tasks.
- Led a contributor community through sprint-based testing and iterative UX improvements, managing the project from research to live deployment.
- Successfully scaled the tool to 10+ weekly active users within the developer community.

Skills

- **Technical:** HTML, CSS, Git/GitHub, Tailwind, Chromium extension development, prompt engineering, LLM-based interface design.
- **Research:** Participatory co-design, usability testing, thematic analysis, and practice-oriented research.
- **Design:** Penpot, Figma, After Effects, Illustrator, Procreate
- **Languages:** Spanish (Native), English (C1), German (B1)
